

## Product Description

### *S.I.S. (Simple Installation System)*

#### **Only Available with our PCS (Premium Contemporary Series)**

Our *S.I.S. (Simple Installation System)*, is a three-part Hot Melt Lamination Process, with a high grade 18oz Automotive Vinyl for the Interior side with a 2.lbs XLPE Closed Cell Foam Insulator inserted in the middle with a high grade 25oz Marine White Vinyl for the Exterior side.

**Vinyl General Characteristic:** Formaldehyde Free, Easy Cleaning, Superior Strength and Durability.

Our new *S.I.S.* has a continuous 1" Soft Loop Strip sewed onto to the top edge with a flexible twin stitch relief line on each Window Cover Panel.

Allows for easy Installation and positing of our *SHT (Soft Hook Tab)* receivers to the Panels, that aligns and attaches easier to the contours of the Windshield and Doors. **See Fig 1. (No Tools Needed)**

Our Hook and Loop attachment system allows for **Easy On** and **Easy Off**, and secures firmly to the Windshield and Doors.

**Two -Twin Stitch Horizontal Fold Lines:** allows for our **Patented Horizontal Tri Fold System**, for easy and convenient storage.

Reduces your cab temperatures up to 20deg or more, which reduces your Idle time resulting in Substantial Fuel Savings.

With choices of three colors for the Interior Side: #6890 Grey, #7043 Tan and #4568 Maroon.

**(Fig 1) Doors**

## Installation Instructions

### Premium Contemporary Series: SIS (Simple Installation System)

*Please review Typical Premium Installation Instructions first!*

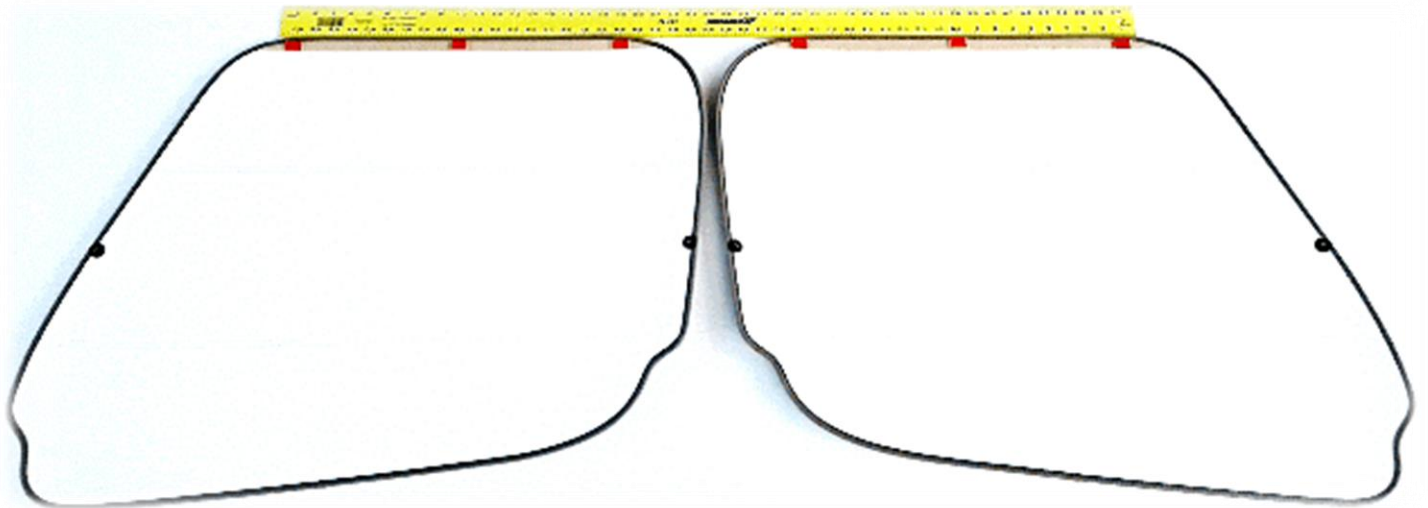

Our new **(S.I.S.)** has a continuous 1" Soft Loop Strip sewed onto to the top edge with a flexible twin stitch relief line on each Window Cover Panel.

Allows for easy Installation and positing of our **SHT (Soft Hook Tab)** receivers to the Panels, that aligns and attaches easier to the contours of the Windshield and Doors

**Doors:** Placement of **SHT (Soft Hook Tabs)**

Typical Placement of the **SHT** is **Right-Center-Left** of the top portion of each Panel, place **SHT** on each end of the Panel first then find center and place the **SHT** as seen below.

**Windshield:** Placement of **SHT (Soft Hook Tabs)**

Typical Placement of the **SHT** is the same for the Windshield Panels, place **SHT** on each end of the Panel first then find center and attach **SHT**, then divide that center equally, from that point and attach the **SHT** as seen below.
